Mavhela Tondani Exercize 1

1. SELECT statement

```
SELECT *
FROM employees;
```

2. SELECT DISTINCT statement

```
SELECT DISTINCT department AS Departments
from employees;
```

3. OrderBy statement

```
SELECT first_name,
       Last_name
from employees
ORDER By salary DESC;
```

4 Limit statement

```
SELECT first_name,
       Last_name
from employes
ORDER By salary DESC
Limit 5;
```

6. AND statement

```
SELECT first_name,
       Last_name
from employees
WHERE NOT department = 'IT';
```

8. OR statement

```
SELECT  first_name,
        last_name
FROM    employees
WHERE   department = 'HR' or department = 'Marketing';
```

9. IN statement

```
SELECT  first_name,
        last_name
FROM    employees
WHERE   department IN ('HR', 'IT', 'finance');
```

10. Combining conditions

```
SELECT  first_name,
        last_name
FROM    employees
WHERE   department = 'IT'
  AND   salary >= 50000
  AND   city = 'New York';
```

11. SELECT first_name,
last_name
FROM employees
WHERE department IN ('Finance', 'Marketing')
AND salary > 50 000
ORDER BY salary DESC;

12. Combining select distinct, where and IN

```
SELECT distinct  city
WHERE department NOT IN ('Finance')
```

13. Combining WHERE, OR, IN and LIMIT

```
SELECT  first_Name,
        last_Name
from    employees
WHERE   department NOT IN ('finance')
AND     salary >= '50 000'
ORDER By hire_date Asc
```

14. Combining where, OR, IN, and LIMIT

```
SELECT  first_name,
        Last_name
FROM    employees
where   (city='chicago' OR city='Los Angeles')
AND department IN ('IT', 'Marketing')
LIMIT 3;
```
